

Partners In Care

Hospice House

A place of comfort, peace,
and specialized care.

When short-term round-the-clock nursing support is needed, Hospice House provides exceptional care in a peaceful, homelike setting. Once symptoms are managed, patients may return home to resume care from their regular hospice team. Also, if a loved one could use a break from daily caregiving, Hospice House is the perfect home away from home for our patients.

Each spacious suite includes a large adjustable bed; chair and sofa that extend into guest beds; private bathroom with walk-in shower; smart TV; large windows that open; a mini refrigerator; and beautiful artwork. Other amenities include a chapel with its unique candle wall, spa, activity room, birds nest swing, blanket warmers, gardens; and a beautiful Great Room with outdoor patio and play area.

A few reasons patients receive care at Hospice House:

- Pain levels cannot be alleviated at home
- Uncontrolled nausea and vomiting
- Severe shortness of breath
- Needing to receive medications intravenously
- Wound care that cannot be managed at home
- Uncontrolled seizures
- To provide up to a 5-day break for a caregiver
